

Traverser

Traversing printer system, ideal for printing onto stationary packaging material.

The Rotech Traverser is ideal for printing onto a stationary packaging material, typically the top web of a multi-lane, vacuum-forming machine, but with uses in a wide variety of applications.

Versatile

Programmable for any number of lanes. Can be fabricated to suit any width of parent machine.

High-Resolution

Can produce up to 5 prints per sweep (including autodate/time codes, graphics and barcodes)

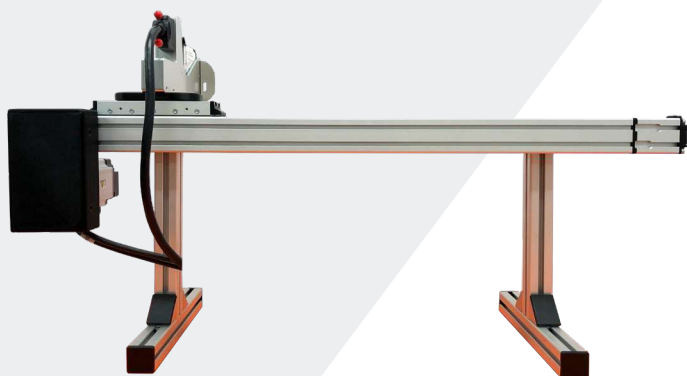

Operator Friendly

Controlled from a touch-screen HMI with password protection and free format design software.

Full UK Support

Our support team are always on hand to offer you assistance when needed. Installation and training can be provided.

SPECIFICATIONS

	Traverser
Speed	Max 50m/min
Size	Min 500mm Max 1.5 meters
Print height	Max
Print quality	900dpi
Protection class	IP65
Temperature range	5 - 45 °C
Operating noise	< 70 dB(A)
